

BULLETIN #092817A: NEW LOCATIONS FOR GUIDE SPECS

Applied & Distribution Products

In an effort to make it easier for our customers to locate guide specs, we have moved them from the password protected area of our websites (myLGHVAC), to the respective product literature areas of the DFS and VRF websites. We hope that eliminating the need to log in to myLGHVAC will make it simpler for our customers and channel partners to access these documents.

Where can I locate this document?

Guide specs for DFS products are located on www.lg-dfs.com > Product Support > Product Literature > [Guide Specs](#)

LG DUCT-FREE SYSTEMS > Product Support > Product Literature
